

## **JOB DESCRIPTION: LANDSCAPE ARCHITECT (ENTRY-LEVEL)**

Croy Engineering LLC is a multidisciplinary firm providing design services for both public and private clients including parks, greenways, commercial sites, streetscapes, environmental, and transportation related projects. Currently, Croy Engineering LLC has an opening for an entry-level Landscape Architect. Responsibilities will include concept & schematic design, CAD drafting, basic renderings, construction document drafting, assisting with development of opinions of construction costs, and coordination with project team members both inside and outside of the firm.

Candidate should have a basic understanding of:

- AutoCAD Civil 3D drafting
- Hardscape design
- Sustainable landscape design
- Irrigation design

Preferred working knowledge or desire to learn the following:

- Land F/X
- Adobe Photoshop
- Adobe InDesign
- SketchUp, SITEOPS or similar 3D modeling software

Candidate should expect to perform in a deadline-driven environment. The candidate shall hold a minimum of a Bachelor of Science degree in Landscape Architecture from an accredited program. Candidate is expected to either have taken or register for the LARE within the first year of employment, to begin seeking professional licensure. Strong interpersonal skills and ability to communicate effectively and professionally verbally and in writing required.

This position offers placement in Huntsville, AL office.

Please submit the following to [mhutson@croyengineering.com](mailto:mhutson@croyengineering.com) for consideration:

- Cover letter
- Resume
- Three professional references
- Portfolio with description of tasks/responsibility for each example of work.
